

Settings – Logo

You can add your logo to customise your eBoss database as follows:

- Click Settings > Logo (at top of screen)
- Click 'Browse' and locate the logo you require on your local machine
- Select the logo and click 'Open'
- Click the 'Upload Logo' button

Your new logo will now appear top-left of your eBoss database.

**The space available for the Logo is approximately 128px wide, by 62px high. The closer your uploaded logo matches these dimensions, the better it will look.
